## Call for Abstracts

This event encompasses the full range of well intervention practices including coiled tubing, slickline, e-line and hydraulic workover as well as specialist tools and solutions.

Presentations, which need not be full papers, will be welcome on relevant topics such as:

- Electric and mechanical wireline interventions
- Tractor and powered mechanical interventions
- Coiled tubing interventions
- Through tubing drilling and completions
- Intervention hardware and technology
- Plug & abandonment

Themes for presentations may include:

- Safety innovations
- Recommended techniques and practices
- Technology development and results

Case studies, from the NCS, UKCS or other areas worldwide, are particularly welcome.
